Description

Flow-through electrode holder for general applications for a
Combination gel-electrode (pH- or ORP sensor)
Easy to dismantle via screw cap

Details

Material in contact with test water:

PVC

Operation temperature:

max. 50 °C

Nominal size:

DN 25

Installation:

Glue-in ends

Options: flange or
fittings (see below)

Order-numbers:

Flow-through armature GD-1, glue-in ends

6604251

Additional charge for fittings DN 25

6604252

Additional charge for flange fittings DN 25

6604253
