Description

Standard flow-through electrode holder for up to
3 electrodes (pH / Redox / Pt-100)

or one conductivity sensor

Holder with separate connector box
for cable connection

Electrode installation in base plate via PG screwings

Details

Material in contact with test water:

PP and Makrolon

Material of the holder head:

PVC / ABS

Operation temperature:

max. 60 °C

Connections: DN

25

Installation:

Serrated fittings 20 mm ID

Option: screw fittings DN 15 PP

Order-numbers:

Flow-through armature GD-43 for pH, with Serrated fittings and connection box

6601191

Flow-through armature GD-43 for pH, with Serrated fittings, without connection box

6601171

Flow-through armature GD-43 for pH, with screw fittings and ring-electrodes

6601191

Flow-through armature GD-43 for O₂, with screw fittings and connection box

6601183
