## Description

Sensor for high conductivity measurements in laboratory applications, glass shaft with 2 ring-shaped platinized platinum electrodes. High chemical resistance. With plastic funnel at upper end and stopcock at lower end for filling and discharging, and with plug-in connector to connect the cable.

Max. temperature:	100	°C
Accuracy:	+/-	1 %
C- value:	10	
Recommended measuring range:	1 - 500	mS/cm
Outer diameter:	32	mm
Length:	350	mm

## Order number:

LD-10 (C = 10) 4121611
